Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 September 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. Claims 1-17 are presented for examination. Claims 7-10 are elected for examination.
2. Applicant's election with traverse of Group I in the reply filed on 9/27/2004 is acknowledged. The traversal is on the ground(s) that the mans-plus function claim terminology fails to show that the combination as claimed does not require the particulars of the sub-combination. This is not found persuasive because the claims of Group II claim information-processing apparatus which does not require the subcombination of information-presenting apparatus claimed in the claims of Group I. The combination as claimed (Group II) does not require the particulars of the subcombination (Group I) as claimed because the subcombination has separate utility. See MPEP 806.5(c) example I.

The requirement is still deemed proper and is therefore made FINAL.

3. Claims 1-6 and 11-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected Group, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 9/27/2004.
4. The information disclosure statement (IDS) submitted on 11/26/2001 is being considered by the examiner.

Art Unit: 2154

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 7-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Akester et al (hereinafter Akester), WO 97/37499, published on October 9, 1997.

7. As per claims 7 and 9-10, Akester taught the invention as claimed including an information-processing apparatus, method and a program-storing medium for storing a computer-executable program, comprising:

- a. An input control means for controlling an operation to input transmitted information on a first transmission destination (e.g., voice message service), a second transmission destination (e.g., office telephone number) and a criterion for selecting either said first transmission destination or said second transmission destination from an information-presenting apparatus (page 1, lines 19-33, page 7, lines 12-19, page 21, lines 7-10, 29; priorities or confidence value CV); and
- b. A transmission control means for controlling transmission of information on said first transmission destination, said second transmission destination and a criterion for selecting either said first transmission destination or said second transmission destination to said information-presenting apparatus (page 6, lines 9-21, page 7, lines 1-11, page 21, lines 20-22).

Art Unit: 2154

8. As per claim 8, Akester taught the invention as claimed in claim 7. Akester further taught said input control means further controls an operation to input transmission-method information indicating a first transmission method for said first transmission destination and a second transmission method for said second transmission destination, whereas said transmission control means is capable of controlling transmission of information on transmission methods to said information-presenting apparatus (initiating call using corresponding phone numbers, page 6, lines 9-21, page 7, lines 1-11).

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
